

OneAIM

Website Editorial Guide

Complete guide to editing and maintaining the OneAIM website

Version 1.0 · 2026

This guide explains how to maintain and update OneAIM website content – without requiring programming knowledge. All changes happen in a small number of clearly described files.

Table of Contents

1. Managing Team Members
2. Adding New Locations
3. Publishing News Posts
4. Adding Partners & Logos
5. Managing Application Phases
6. Editing the AIM Connect Timeline
7. Editing FAQ Questions
8. Editing the Imprint
9. Adjusting Colors & Header
10. Background Colors on Individual Pages
11. Texts on Various Pages
12. Quick Reference: Files & Purpose

1. Managing Team Members

All team members are managed in a single file. No components or pages need to be touched.

Datei / File

```
src/data/team.ts
```

Adding a new member

1. Copy the profile photo (JPG, PNG or SVG) to **public/images/team/**. Recommended: square, at least 200×200 px.
2. Add an entry in **src/data/team.ts**:

```
{
  id: 'max-mustermann',
  name: 'Max Mustermann',
  role: 'Head of Design',
  photo: '/images/team/max-mustermann.jpg',
  city: 'muenchen', // oder 'aachen' oder 'both'
  linkedin: 'https://linkedin.com/in/...', // optional
},
```

■ Tipp

The city field determines on which location page the member appears. 'both' shows them on both pages.

Removing a member

Delete the corresponding `{}` block from the array in **src/data/team.ts**.

Changing the order

The order in the array determines the display order in the carousel.

2. Adding New Locations

The website supports any number of locations. Each new location requires its own data file and an entry in cityData.ts.

Step by step

src/data/cityData.ts

Add a new entry in the cityData object (copy all existing fields and adjust).

src/data/team.ts

Add team members with city: 'hamburg' (or similar).

src/data/connect-hamburg.ts (neu)

Create a new file for AIM Connect events (based on connect-munich.ts).

src/data/faq.ts

Add FAQ entries for the new program.

src/pages/[city]/aim-connect.astro

Import the new file and add it to the eventMap.

src/data/application.ts

Add application status for the new location.

cityData.ts – Example entry

```
hamburg: {
  slug: 'hamburg',
  displayName: 'Hamburg',
  heroHeadline: 'AIM in Hamburg',
  heroSubtext: 'OneAIM kommt nach Hamburg.',
  introText: ['Text...'],
  instagram: 'https://instagram.com/oneaim.hamburg',
  aimConnect: { intro: '...', cards: [] },
  aimCode: { intro: '...', whyCards: [], programs: [] },
  team: [],
  teaserImages: {
    aimConnect: '/images/teasers/aim-connect.svg',
    aimCode: '/images/teasers/aim-code.svg',
    team: '/images/teasers/team.svg',
  },
},
```

3. Publishing News Posts

Datei / File

```
src/data/newsData.ts
```

Adding a new post

1. Copy the preview image to **public/images/news/** (JPG, PNG, SVG).
2. Add a new entry to the array in **src/data/newsData.ts**:

```
{
  id: 'mein-beitrag-2026', // eindeutige ID (keine Leerzeichen)
  title: 'Titel des Beitrags',
  date: '2026-07-15', // Format: YYYY-MM-DD
  excerpt: 'Kurzbeschreibung...',
  image: '/images/news/bild.jpg',
  imageAlt: 'Beschreibung des Bildes',
  tags: ['München', 'Event'], // beliebige Tags
},
```

Tags

Tags are freely definable. For automatic color coding, use the following category names:

Kategorie / Category	Beispiele / Examples	Farbe / Color
Standort / Location	München, Aachen	Hellblau / Light blue
Programm / Program	AIM Connect, AIM Code	Lila / Purple
Event-Typ / Event type	Event, Workshop, Conference, Makeathon	Pink
Sonstiges / Other	Research, Partnership	Grün / Green
Beliebig / Free	Jedes andere Tag / Any other tag	Grau / Grey

■ Tipp

Sorting happens automatically based on the date field (newest first). The order in the array does not matter.

4. Adding Partners & Logos

Datei / File

```
src/data/partners.ts
```

Adding a new partner

1. Copy the logo file to **public/images/partners/**. SVG preferred, alternatively PNG with transparent background.
2. Add an entry in **src/data/partners.ts**:

```
{  
  id: 'mein-partner',  
  name: 'Mein Partner GmbH',  
  logo: '/images/partners/mein-partner.svg',  
  logoAlt: 'Mein Partner GmbH - Logo',  
  website: 'https://www.mein-partner.de', // optional  
},
```

Order in the carousel

The order in the array determines the display order in the sponsors carousel.

Logo formats

Format	Empfehlung / Recommendation
SVG	Ideal – skaliert verlustfrei, kleine Dateigröße
PNG	Transparenter Hintergrund erforderlich
HEIC	Vorher konvertieren (nicht browserkompatibel)
JPG	Nur wenn kein transparenter Hintergrund nötig

5. Managing Application Phases

The entire application logic is controlled in a single file. No changes to components or pages are needed.

Datei / File

```
src/data/application.ts
```

Opening applications

```
muenchen: {  
  isOpen: true, // ← auf true setzen  
  deadline: '1 March 2027', // ← Frist anpassen  
  link: 'https://...', // ← Bewerbungslink  
},
```

Closing applications

```
muenchen: {  
  isOpen: false, // ← auf false setzen  
  deadline: '',  
  link: '',  
},
```

Website behavior

isOpen	Anzeige / Display
true	Grüner Puls-Punkt + 'Applications Open' + Fristtext + 'Apply now'-Button
false	'Applications are currently closed.' – kein Button

■ Tipp

Munich and Aachen have independent entries – you can control them separately.

6. Editing the AIM Connect Timeline

Dateien / Files

```
src/data/connect-munich.ts // Events für München
src/data/connect-aachen.ts // Events für Aachen
```

Adding a new event

1. Copy the event image to **public/images/events/**.
2. Add an entry in the respective file:

```
{
  id: 'muenchen-neues-event-2027',
  title: 'Name des Events',
  date: '2027-03-15', // Format: YYYY-MM-DD
  description: 'Kurzbeschreibung...',
  image: '/images/events/mein-bild.jpg',
  location: 'Munich',
  category: 'Workshop', // s. Kategorien unten
  tags: ['AI', 'Healthcare'],
  featured: false, // true = besonders hervorgehoben
},
```

Available categories

Kategorie / Category	Farbe / Color
Kick-Off	Blau / Blue
Company Visit	Grün / Green
Workshop	Lila / Purple
Conference	Orange
Networking	Dunkelblau / Dark blue
Makeathon	Pink
Social Event	Gelb / Yellow

■ Tipp

The timeline sorts events automatically by date (oldest first). The order in the array does not matter.

7. Editing FAQ Questions

Datei / File

```
src/data/faq.ts
```

File structure

```
faq.aimConnect.muenchen → AIM Connect München  
faq.aimConnect.aachen → AIM Connect Aachen  
faq.aimCode.muenchen → AIM Code München  
faq.aimCode.aachen → AIM Code Aachen
```

Adding a new question

```
// in src/data/faq.ts – gewünschten Bereich öffnen:  
aimConnect: {  
  muenchen: [  
    // ... bestehende Fragen ...  
    {  
      question: 'Neue Frage?',  
      answer: 'Antwort auf die Frage.',  
    },  
  ],  
},
```

Deleting a question

Remove the { question: ..., answer: ... } block from the array.

Changing the order

The order of entries in the array determines the display order.

8. Editing the Imprint

Datei / File

```
src/pages/impressum.astro
```

The file contains all required information as HTML-like tags. Texts can be edited directly without changing any CSS or logic.

Changing the address

```
// in src/pages/impressum.astro:  
<p>  
Max Mustermann<br/>  
OneAIM e.V.<br/>  
Musterstraße 1<br/>  
80331 München  
</p>
```

Replace the lines inside the tags directly.

■■ Wichtig / Important

All sections marked with // DUMMY must be replaced with legally reviewed, real data before going live. Seek legal advice if in doubt.

9. Adjusting Colors & Header

All website colors are centrally managed in a token system.

Farb-Tokens / Color Tokens

```
src/styles/tokens.css
```

Key color values

Token	Aktueller Wert / Current Value	Verwendung / Usage
--color-brand-blue	#0052E9	Hauptfarbe, Links, Buttons
--color-brand-blue-dark	#232ACF	Hover-Zustände, Überschriften
--color-brand-blue-light	#C9D8FF	Hintergründe, Rahmen
--color-accent-pink	#D400FF	Sekundär-Buttons, Akzente
--color-accent-purple	#8D2DF1	Icons, Gradienten
--color-bg-page	#EEF3FF	Seiten-Hintergrund
--color-bg-surface	#FFFFFF	Karten, Formulare
--color-bg-footer	#000000	Footer-Hintergrund

Adjusting the header

```
src/components/navigation/Header.astro
```

Was / What	Wo / Where	Beispiel / Example
Logo-Größe	.site-header__logo-img → height:	height: 44px
Logo austauschen	public/logo.png ersetzen	—
Nav-Schriftgröße	.site-header__nav-link → font-size:	font-size: 1.05rem
Nav-Schriftgewicht	.site-header__nav-link → font-weight:	font-weight: bold
Header-Höhe	src/styles/tokens.css → --header-height:	header-height: 61px
Nav-Link-Farbe	.site-header__nav-link → color:	color: #0052E9

10. Background Colors on Individual Pages

Many sections accept a background prop. The following values are available:

Wert / Value	Farbe / Color	Verwendet für / Used for
page	#EEF3FF (Hellblau / Light blue)	Haupthintergrund
subtle	#C9D8FF (Blau / Blue)	Abwechselnde Sektionen
surface	#FFFFFF (Weiß / White)	Karten, Content-Flächen

Changing a section's background

```
// in der jeweiligen Seite (.astro-Datei):  
<ContentSection heading='...' background='subtle'>  
<MissionSection background='surface' />  
<FAQSection background='page' />
```

Changing the global color

To change the background color of the entire page, adjust **--color-bg-page** in **src/styles/tokens.css**.

```
/* src/styles/tokens.css */  
--color-bg-page: #EEF3FF; /* aktuell: hellblau */  
--color-bg-subtle: #C9D8FF; /* aktuell: blau */  
--color-bg-surface: #FFFFFF; /* aktuell: weiß */
```

11. Adjusting Texts on Various Pages

Seite / Page	Datei / File	Was bearbeiten / What to edit
Startseite Hero	src/pages/index.astro	headline, subtext im <Hero>-Tag
Startseite Intro	src/pages/index.astro	Text in <ContentSection>
Stadt-Einleitung	src/data/cityData.ts	introText[], heroHeadline, heroSubtext
AIM Connect Intro	src/data/cityData.ts	aimConnect.intro
AIM Connect Cards	src/data/cityData.ts	aimConnect.cards[].title + bullets
AIM Code Intro	src/data/cityData.ts	aimCode.intro
AIM Code Cards	src/data/cityData.ts	aimCode.whyCards[], aimCode.programs[]
Team-Seite	src/data/cityData.ts	Heading/Subtext in aim-connect/team.astro
Mission-Sektion	src/components/sections/MissionSection.astro	missionCards-Array im Frontmatter
Approach-Sektion	src/components/sections/ApproachSection.astro	approachCards-Array im Frontmatter
Partner-Subtext	src/components/sections/PartnersSection.astro	op>-Text unterhalb der Überschrift
Footer-Newsletter	src/components/navigation/Footer.astro	Überschrift + Subtext im CTA-Block
News-Seitentext	src/pages/news/index.astro	pub-header__sub <p>-Element
Publications-Text	src/pages/publications/index.astro	pub-header__sub <p>-Element
Contact-Seite	src/pages/contact.astro	Überschrift + Formular-Labels
Impressum	src/pages/impressum.astro	Alle <p>-Blöcke in den Sections

■ Tipp

The majority of content texts are in src/data/cityData.ts. This file is the first place to look for text changes on city pages.

12. Quick Reference: Files & Purpose

Datei / File	Zweck / Purpose
src/data/cityData.ts	Standortdaten, Texte, Bilder-Pfade
src/data/team.ts	Alle Teammitglieder
src/data/partners.ts	Alle Partner & Logos
src/data/newsData.ts	Alle News-Beiträge
src/data/publicationsData.ts	Alle Publikationen
src/data/faq.ts	Alle FAQ-Fragen
src/data/application.ts	Bewerbungsstatus pro Standort
src/data/connect-munich.ts	AIM Connect München – Timeline-Events
src/data/connect-aachen.ts	AIM Connect Aachen – Timeline-Events
src/styles/tokens.css	Alle Farben, Schriften, Abstände
src/components/navigation/Header.astro	Logo, Navigation, Header-Design
src/components/navigation/Footer.astro	Footer-Links, Newsletter-CTA
src/pages/index.astro	Startseite – Struktur & Sektionen
src/pages/impressum.astro	Impressum – alle Pflichtangaben
src/pages/contact.astro	Kontaktseite & Formular
public/logo.png	Offizielles OneAIM-Logo
public/images/team/	Profilfotos der Teammitglieder
public/images/partners/	Partner- & Sponsor-Logos
public/images/news/	Vorschaubilder für News
public/images/events/	Bilder für Timeline-Events
public/images/publications/	Bilder für Publikationen
public/images/teasers/	Teaser-Bilder auf Übersichtsseiten

This guide covers the most common editorial tasks. For more complex changes or new features, Claude is available to assist.
